In a telephonic conversation with the Examiner on October 7, 2004, with the below-signed attorney, Andrew C. Walseth, the Examiner and Applicant discussed pending claims 1-21 of the Present Application. The Examiner and Applicant specifically discussed the patentability of claims 1-21 over Honda et al. (U. S. Patent No. 6,377,502), which was cited in a Divisional Application (U.S. Application No. 10/375,160, which issued as U.S. Patent No. 6,735,122 on May 11, 2004) and indicated by the Examiner to also be applicable to the Present Application. The Examiner and the Applicant agreed that Honda et al. does not teach or disclose either a first or second read circuits having an adjustable sense amplifier circuit. The Examiner indicated that claims 1-15 would be allowable if they were amended to specifically claim an adjustable sense amplifier.

The Examiner and Applicant agreed to an Examiner's amendment that amends claim 13 to include the limitations of dependent claim 15 and canceling claim 15 to reflect this understanding. Claims 16-21 were also cancelled without prejudice by the Applicant to allow the Present Application to issue. The Applicant reserves the right to reintroduce claims 16-21 in future Continuation Applications. The Examiner indicated that she would review the Present Application and issue an Office Action or a Notice of Allowance based on this Examiner's Amendment.

Applicant believes the foregoing Summary accurately reflects the substance and scope of the telephonic interview of Thursday October 7, 2004. Applicant requests notification if the Examiner disagrees with the accuracy or completeness of the Summary.
